# How does it work?

We provide solutions to help suppliers increase their sales.

### Upload diamond

Upload your diamond stock using Excel API, or FTP. Submit with complete details such as NO BGM, eye clean, image, and video links to maximise online sales.

### Orders

You'll get an order request with a notification in the supplier centre, where you can approve your order.

### Checking for Quantity

A quality check is performed on the diamond to confirm that all facets are conflict-free when an order is confirmed.

### Invoicing

once the quality is approved by the grader, the supplier can make the final invoice.

### Payment

The payment will be done in between 12-15 days from the date of the invoice.

# OUR JOURNEY

January, our efforts helped us lock a **new collaboration deal** with a company that paved way for our expansion overseas. As we move ahead, we will open new doors of opportunities for everyone.

**2018**

**2016**

Launched as **R.K Exports**, the group aspired to connect with jewelers from across the globe through a unified platform for buying high-quality diamonds.

**2021**

2021 RK Exports renamed as **The Diamond Port**. Open office in **HK, BLG, USA** to cater jewelers and suppliers.

**2022**

We are still expanding globally at various locations.
